

200:1 Gear Reduction Motor - ASR00016

 tinycircuits.com/products/200-1-gear-reduction-motor

DESCRIPTION

Add motion to your TinyDuino project! This gear motor uses the same JST connector that can be found on our [Dual Motor TinyShield](#), meaning it can be plugged right in without any soldering or crimping.

This motor has a built in gearbox which achieves 200:1 speed reduction for high torque. This makes it great for applications like robotics and anything else that would require high torque in a small package.

Fits any wheel, gear, or other attachment that fits a 3mm diameter D profile shaft, like our [45mm Wheels](#).
